ErgoSoft RIP
## High Fidelity RIP Solution

High Fidelity RIP Software

ErgoSoft RIP Version 15 is the high-fidelity RIP software solution for the digital printing industry.

Integrating todays leading image processing technologies, unsurpassed production tools and an intuitive interface, ErgoSoft RIP provides an intelligent workflow for highest levels of productivity.

The ErgoSoft RIP s a powerful yet intuitive composing suite incorporating state of the art image positioning and editing features as well as strong workflow automation tools.
Each ErgoSoft RIP includes eight simultaneous RIPServers to enable a fast production workflow.

Composing

The JobComposer is the home of the ErgoSoft Print Environments, Density Linearization Wizard and ColorGPS Output Profiler.
The ErgoSoft JobComposer is available as Essential or Production edition.

JobComposer Essential
The JobComposer Essential offers the best printing output and a variety of different features for job editing. JobComposer Essential is ideal for applications with less complicated requirements while still producing the best printing results.

JobComposer Production
The JobComposer Production is the perfect tool for the most demanding and difficult areas of digital printing. The long feature list fulfills nearly every desire and includes functions to optimize color results, workflow and productivity.

Output & Drivers

ErgoSoft RIP software supports over 1200 printers, cutters or measuring devices from over 140 manufacturers worldwide.

Each PrintClient represents one physical printer or cutter featuring easy to use queue management, production control and device maintenance.

- Manage production queue
- Full control over job details
- JobPreview
- Online, manual or offline modes
- Create and schedule maintenance jobs

The ErgoSoft RIP Startup Manager allows precise organization of the available ripping power.

Leading Technology

ErgoSoft RIP features a strong, integrated PostScript/PDF interpreter that allows a fast and reliable production workflow.

With ErgoSoft Stochastic 3sf, ErgoSoft RIP Version 15 brings an improved Stochastic based raster method to market, emphasizing the company's desire to improve core technologies.

Based On Experience

Developed by ErgoSoft AG, a software company with more than 25 years of experience in creating digital printing application, ErgoSoft RIP brings the highest productivity, quality control, a broad variety of color, production controlling and automation tools to your printing facility.
